WORKING PLATFORM

What is MMC ?

MMC is one such relatively new coin. Its biggest advantage is the low cost of starting trading. Investors have to spend less for trading in this coin. The most discussed is that its investors do not have to pay any fees on the transaction.

How does the MMC network work? ?

MMC is a decentralized block chain platform designed to promote content and entertainment. The network has the capacity to process 2,000 transactions per second and is based on a delegated proof-of-stake consensus. MMC users elect "Super Representatives" (SRs) to validate transactions and earn fees for their services.

DECENTRALISATION

A decentralization is an organization that uses a transparent computer program or platform and electronically predetermined rules to automate decisions and facilitate transactions without any central authority.

Decentralization in Block chain In Block chain, decentralization refers to the transfer of control and decision-making from a centralized entity (individual, organization, or group thereof) to distributed network. Decentralized networks strive to reduce the level of trust that participants must place in one another, and deter their ability to exert authority or control over one another in ways that degrade the functionality of the network.

Benefits of decentralization Improves data reconciliation Improves data reconciliation
Reduces points of weakness Provides a highly trust environment
